ADDITIONAL INSTRUCTIONS

FABRIC

"Thumper" is made from two different coloured fabrics. When laying out your pattern pieces, make sure you have the right pieces on the right fabric.

SEWING UP

As the arms, legs, head & body are made in different colours, you will need to sew these parts together first so that the resulting pieces are the same as normally found in a standard bear pattern. Place the pieces fur side together & sew - i.e. feet to legs, paws to arms, nose to head. Once this is done, the pattern becomes less complicated.

DARTS

The front part of the body and the brown tail piece both have darts in them. Just fold the piece of fabric with fur sides together and sew up dart as indicated on the pattern.

Assemble bear as per standard instructions - EXCEPT FOR THE FOLLOWING:

TAIL

Sew pieces together and do not stuff. Sew to body of rabbit at point where brown & white fabric meet at base of back. Tail should be attached with white side outermost.

LEGS

Insert Bendy Bits into foot and work lug end into the top of leg. Now pass joint bolt through lug and joint bear as normal. Check that when Bendy Bit is bent into leg & foot shape that it does not reach to toe - It should be at least 1cm short. If not, remove and cut shorter. When stuffing the legs make sure that the Bendy Bit is in the centre of the leg and his toes are well filled, so that nothing can be felt from the outside. As Thumper is designed to stand, his legs will need to be stuffed firmly to help support him.

EARS

Ears should be attached brown side up, so that they hang down the side of the head.
